For 25 Years - The
Premier Magazine
for Amateur
Repeater Owners &
Users
in The SouthEast

The Voice of the SouthEastern Repeater Assn., Inc.
Published 4 Times A Year in Feb., May, Aug., Nov.

Page 1 - Editorially Speaking . . . !

This 'n' That . . .

After some pretty messy coordinations as a result of inaccurate information, our SERA coordinators are getting a little "hard nosed" at those repeater owners who fail or otherwise refuse to return correct information about their repeaters. I understand, some of our Directors are even talking "de-coordination." That might get some attention from those who don't seem to care enough to cooperate. (See Story)

It's been a bad month for people we know. Ted Wolfe, WD4KHL remains in the hospital in Charleston, WV. James of IRI Electronics' father had an emergency recently. Frank Forehan, our Repeater Journal printer had a heart attack, and quad bypass in June, and Ray of Ray's Electronics suffered a second minor stroke in early July.

It is wierd!!!! I swear, I received more response to the question about what's unusual about last issue's cover photo than I did with the \$5,000 prize ladder membership contest last year. And the cover photo had NO prizes.

Oh yes, I think probably the one that took the prize (if there had been one). Someone said all the people were missing from the picture. It seems there was a bear under the tarpaulin, which scared them all away. He said he hadn't noticed it at first, but a 60 powered magnifier put to use, enabled him to make out the image of the bear . . . under the tarpaulin . . .

"Wow" - what a guy!!!!

We're doing lots of experimenting with photos this issue. We don't have our scanner yet, but we have gone and used someone else's on a few photos. We have one sent down via internet, and we have a few sent to us on disc via Seattle Film Works, which is quite a neat and interesting setup.

The biggest thing we have to do, is to find out just how much toning and dot sizing we need to output on paper, have that paper shot on a camera to a negative, then print on page from a press, and result in a pleasing picture. So bear with us, it will take several issues, and probably lots of "funny" looking pictures before we finally get it right and consistent.

INVOICING AD INSERTION ORDERS

DEALERS: With a volunteer staff we do not send out and receive advertising contracts and notices. Quarterly dealer invoices, after insertion, will request information pertaining to future insertions. If no instructions on the paid returned invoice copy are received, the ad will be repeated and invoiced the upcoming quarter.

HAMFEST: advertising must be ordered each edition for insertion. Payment must accompany insertion order/ advertising copy for Hamfest ads.

ADVERTISING PAYMENT POLICY

Advertising invoices are due upon receipt. Unpaid invoices will require us to withhold any additional ads in until account is paid in full. All Hamfest advertising and Business Card Advertising must be paid in advance of insertion.

SPECIFICATIONS & GENERAL

Sizes listed Above are width by length in that order. Ads received that do not fit dimensions will be adjusted to the nearest ad size and be billed \$8.00 production fee. The ad will be billed at the size rate it had to be adjusted to.

Prices quoted are for exact size, camera-ready positive photoprint, pasteup or Laser print ad copy.

Full color ads for covers require negatives, right-reading emulsion down, sized for full 8-1/2x11 bleed. 150-Line screens preferred. Color Match Proof, Color Key or Pre-printed tearsheet should accompany negatives.

Design, typesetting, layout or pasteup is available at a nominal charge.

The Repeater Journal cannot be held liable or responsible for errors in advertising, or to the quality or accuracy of advertising claims.

When possible, advertisers requiring typesetting or composition by the Repeater Journal staff will receive a proof with time for telephone corrections. No proofs are available for ads with typesetting submitted after deadline, due to staff and time limitations.

ADVERTISING DEADLINES

All advertising copy and insertion orders should be sent to the Repeater Journal Advertising Manager:

Sharon Ward
P. O. Box 215,
Tobaccoville, N.C. 27050.
Phone (910) 983-0879 Fax (910) 983-4012

Ad copy deadlines are the 1st of the month, prior to month of publication. New ad insertion order deadline is 10 days prior to copy deadline.

The Repeater Journal cannot guarantee publication of any advertising that arrives after deadline unless prior arrangements are made with the Repeater Journal Editor or Sales Manager.

AD & COPY DEADLINE DATES

FEBRUARY ISSUE - January 1,
MAY ISSUE - April 1,
AUGUST ISSUE - July 1, (NEXT ISSUE!!)
NOVEMBER ISSUE - October 1.

About the SERA Repeater Journal Magazine

The *Repeater Journal*, voice of SERA is published quarterly, the first Friday of the months of February, May, August and November of each year and mailed free to members of Southeastern Repeater Association, Inc., an eight state repeater coordinating organization made up of repeater owners and users. Permission is granted for use of material other than repeater indexes contained in the *Repeater Journal* (See important note this page) provided proper credit is given. The *Repeater Journal* Editor will swap newsletters with other Repeater Organizations. News organizations and clubs upon written request. DEADLINES: Ad space reservations are the 20th of the month, and ad copy due the 1st of the next month, one month prior to publication. News deadlines are the first of the month prior to publication month. The *Repeater Journal* is entered as Third Class Mail at the Post Office in Greensboro, NC. The *Repeater Journal* newsstand cover price is \$3.00 and is available from numerous retail Amateur Dealers in the southeast. All news and newsletter exchanges should be mailed to the Editor: Wayne C. Williams, K4MOB, 600 Lakedale Road, Colfax, NC 27235, Phone (910) 993-5881, or E-Mail: k4mob@nr.nri.net

About the SouthEastern Repeater Association, Inc.

SERA, SouthEastern Repeater Association, Inc. is the largest, most well known, non-profit Repeater Coordinating Organization in the United States. SERA territory covers over 2,130 repeaters available to over 86,000 Amateurs covering 329,000 square miles from the Southeastern member States of North Carolina, South Carolina, Virginia, Tennessee, West Virginia, Kentucky, Georgia and Mississippi. SERA celebrates its 25th anniversary in 1996 with a continuing goal - to serve the repeater owners and users of the Southeast by providing a voice of communications, information and education with the publication of the *Repeater Journal*, and the guidance of our State (Director) Coordinators, officers and volunteers. Support, comments and recommendations are appreciated.

About SERA Associate Membership (Repeater Users)

Amateurs, especially repeater users, are invited to join SERA as Associate Members. Only \$8.00 per year will enable Amateurs to support the organization and receive the *Repeater Journal*. Associate Membership deadlines are the 15th of the month preceding months of publications - (Jan. 15, April 15, July 15, and October 15). Persons joining or renewing their memberships must have their application into the Tobaccoville Post Office Box by those deadlines to receive the next upcoming *Repeater Journal*, published the first Friday of February, May, August and November. Memberships received after deadline will not receive next to be published *Repeater Journal*, but instead will receive the forthcoming issue the following quarter. HOT-P Associate Memberships (Repeater Journals mailed 1st Class rate) are limited to one year memberships at \$14.25 per year. Regular membership *Repeater Journals* are mailed 3rd Class Bulk Mail. SERA does not issue receipts for Membership applications, nor are *Repeater Journals* forwarded to new addresses. If you move, we must be notified. Members should wait until next *Repeater Journal* comes out to report any problems. Write SERA Associate Membership, P.O. Box 215, Tobaccoville, NC, 27050-0215 for further information. Associate Members may hold appointive offices and positions within the SouthEastern Repeater Association, Inc.

About SERA Full Repeater Membership (Repeater Owners)

Officers and Directors are elected from Repeater representatives who are SERA Full Members. Any repeater owner or club may join SERA as a Full Member if they have an operable repeater on the air. Full Membership application, coordination information (if not on file) and \$20.00 should be submitted for the annual Full Membership fee. Two Full Members, named and listed on the application by the owner, receive the *Repeater Journal* from each application. The Full Member repeater is also appropriately recognized as a SERA supporter in the repeater index with an asterisk (*) code. All Full Memberships expire on December 31 of each year. Write SERA Membership, P.O. Box 215, Tobaccoville, NC 27050-0215 for further information.

NOTE: The *SERA Repeater Journal* Copyright 1996 by The SouthEastern Repeater Association, Inc. Original stories, text and charts may be reproduced or re-printed by any organization without prior consent, provided credit is given. The *SERA Repeater Index* may be published or reproduced in any form by any publication or electronic means to be distributed without charge. Appropriate credit must be given to the *SERA Repeater Journal*. Reproduction or publication of the *SERA Repeater Index* in any form, mechanically or electronically for a charge is prohibited without prior written consent of SERA, Inc. All other rights reserved.

What SERA doesn't know - could hurt YOU!

Missing Repeater Datasheets could cause problems

What Could Happen:

Joe Ham has had a repeater on the air for 25 years. He coordinated it in the early days of CVRA.

Four years ago, Joe found a new site which would greatly improve his repeater coverage, so he moved. The repeater moved 20 miles NNW of his old site, and about 150 feet higher.

"I never lifted out those 'dumb' repeater data sheets," Joe said, "SERA keeps sending those things every year - sometimes I write 'same as last year', sometimes I just don't return them at all."

Joe never bothered to coordinate his repeater move, which could have possibly been a formal change in paperwork at the time. He never felt it necessary to make the change on the SERA data sheet. After all, it was only 20 miles.

"What's to hurt, there's no other repeaters on my frequency for 200 miles in any direction," he snarled. "I haven't got time for any of this paperwork crud."

Things went along fine for Joe until last Spring. A group wanted to coordinate a new repeater, and they wanted the same frequency that old Joe had on his machine.

The coordinator, upon receiving the paperwork from the new group, did his search. Sure enough, the area seemed clear in all directions. Old Joe's repeater, according to his coordination was beyond the limit - 103 miles away and it was limited coverage anyhow. No problem here!

The group did some tests that same week that old Joe had his machine off for repairs and maintenance. In fact Joe took almost six months to get his machine back on the air at his new site.

Meanwhile, the newly coordinated repeater came on - nice coverage, good location, no interference problems.

In mid-summer, old Joe got his machine working again, took it back to the site, plugged it in and turned it on.

Strange!!! Someone's already talking on it, when they turned it over to another person, Joe didn't hear them.

They were on the new repeater and one of the guys was getting into Joe's repeater. After all, Joe's repeater was REALLY only 83 miles away, and the user he was hearing lived less than 47 miles away.

We could go on, but you should have the message by now. There's lots of work, lots of headaches, lots of communications and cost to straighten out this mess.

If only SERA had received proper paperwork from old Joe!!!!

-Compiled by the Journal Editor

If you are a coordinator, you hear about the horror stories similar to the "tale" to the left. There are so many things that can happen to make a "bad" coordination, or a "good" coordination turn bad.

Just about every instance we can document, the problems occur when inaccurate data, or no data was not available to the coordinator, concerning the repeater involved.

SERA Repeater Data Sheets

SERA spends over \$2,000 each year, mailing over 72,000 pieces of paper into over 4,000 packages to every known repeater

owner and or his associate in the SERA eight Southeastern states. The reason! So SERA can gather every possible bit of information about every repeater it can. In turn, this will help prevent problems like "ole Joe's" from ever occurring.

SERAs coordinators are becoming quite concerned with some repeater owners who do not send back correct datasheets, or even return them at all.

It is absolutely imperative that the coordinator know within 100 feet of where ever repeater antenna is located. He must have this when he plugs in a coordination request into the software and looks for a vacant channel to place a new repeater.

What happens when you don't send in your location coordinates?

In the past, the coordinator has guessed, based on approximates, your city mentioned, etc. This could make your actual location off enough that a "bad" coordination could occur some day in the future, and your repeater system could be greatly reduced in coverage, due to interference.

Today's frequency coordination is not as much guesswork as it used to be. The coordinators have software that can pick best possible frequency pairs for a location, based on Longitude and Latitude, ERP, HAAT and AMSL of other repeaters near by. We have new software that can calculate ERP, actual signal strength coverage, many great tools to

assist in getting a "good" frequency for a new machine, yet not causing any problems with existing machines.

But . . . Incorrect information!

If the coordinator (SERA) does not have your EXACT location, and ALL the pertinent information about your repeater, he may by accident make a call some day in the future that causes you considerable problem as far as interference and noise is concerned.

We cannot overemphasize the vital importance of having proper and accurate data on all repeater systems in SERA territory. Thousands of dollars of sophisticated software is worthless if bad information is fed into it. We are wasting our's and the repeater owner's time. It won't work.

Who's at fault . . . !

The blame should be placed squarely on the person who failed to provide accurate information. If he has problems, as a result of not cooperating with his coordinator and providing current information, he has only himself to blame.

1997 Data Sheet Mailing

The 1997 SERA Repeater Data sheet mailing will occur sometimes during the second week of September. Every known repeater will receive a package of information. A data sheet containing all the informa

An Amateur Radio Volunteer Examiner Coordinator

TECHNICIAN PLUS LICENSEES! WCARS/VEC WILL CORRECT I to P for you if there is an error in the FCC license database

The Technician Plus (P) is now formally recognized as a separate class of license.

The FCC database was adjusted without issuing corrected licenses reflecting the Technician Plus class to those who hold that class of license. DO NOT make the determination that the database is incorrect from the actual license you physically hold in your hand.

If you are now shown IN THE FCC DATABASE as a Technician and you can DOCUMENT that you should be Technician Plus, WCARS/VEC will correct the error for you. Send a completed and signed FCC form 610 (November 1993 ONLY) and marked for purpose 4B together with a copy of your present license and the original of the documentation (CSCE or written confirmation from the VEC that coordinated the session) to either of our coordinators listed below and we will be happy to also include it in the next electronic file we transmit. If you wish the original of the documentation returned, also include a copy of it for us to keep and an SASE for return of the original. We MUST see the original of the documentation. There is no charge for this service.

Presenting the 40th Annual

SHELBY, NC HAMFEST

The Grand-daddy of them All!

SATURDAY AND SUNDAY

August 31 and September 1

To Be Held At The Cleveland County Fairgrounds

SHELBY, NORTH CAROLINA

ACRES OF FLEA MARKET -- INDOOR DEALER BUILDINGS
CAMPING -- FOOD -- FORUMS -- PRIZES

ARRL Sanctioned and Proudly Sponsored by the Shelby Amateur Radio Club!

VOLUNTEER EXAMS BY WCARS/VEC

Saturday, Aug. 31st at 9:00 a.m. and Sunday Sept. 1st, at 2:00 p.m. at The CLEVELAND COUNTY OFFICE BUILDING, adjacent to the Hamfest grounds. NO PRE-REGISTRATIONS -- **WALK-INS ONLY.**

FOR MORE INFORMATION CONTACT: Norman Harill, N4NH, No. 7 Skylyn Court, Asheville, N.C. 28806

Applicants must bring original and photocopy of present license, any certificates and picture I.D. to the examination session. Make Checks Payable to WCARS/VEC for \$5.90.

AWARDS! AWARDS! AWARDS!

PRE-REGISTRATION AWARD -

ICOM ICT-22AT H/T with Drop-in Charger. Drawing at 0900 Saturday, August 31, 1996.

MAIN AWARDS -

Drawings Saturday, Aug. 31, and Sunday, Sept. 1st 1400. ICOM IC-706 HF/VHF Transceiver

HOURLY AWARDS:

ICOM IC-2000H 2-Meter, given hourly Saturday, Aug. 31, and Sunday Sept. 1, beginning at 0900 thru 1300.

Major awards obtained through the cooperation of ICOM CORP. and DOC'S COMMUNICATIONS

SPECIAL 40TH ANNIVERSARY PRIZES

\$40.00 To be given away 4 times each day: 10:00 AM, 11:00 AM, 12:00 NOON, and 1:00 PM

You will have 1 hour to claim these cash prizes, and must be present to win.

NO Member of the Shelby Amateur Radio Club or immediate Family is eligible to win any Awards.

The Shelby Hamfest

LOCATION - Cleveland Cty Fairgrounds on U.S. 74 Bus., at intersection of NC 180, 3-1/2 miles east of Shelby.

FACILITIES - Indoor buildings for all new equipment dealers. Over 15 acres for all types of tailgating. Plenty of FREE parking outside grounds.

REGISTRATION - \$4.00 for pre-registration and \$5.00 at the gate. All tickets good for both days. children under 12 FREE. Pre-registration ticket requests received after August 25 will be held at the front gate.

OVER-NITE CAMPING - Spaces not available until Sunday, August 25. Facilities include over 40 sites with full hook-up, water, sewer and electricity. Sites available on a first-come basis and **none will be reserved under any circumstances**. Unlimited field space for self contained units.

\$10.00 per day for full hook-ups (lights, water, sewer)

\$5.00 per day for water and lights

\$5.00 per day for tents, etc.

ATTENTION MOTOR HOMES: If you must drive your motor home away from your campsite, please notify the camping committee chairman, Keith Queen, KR4VY, and receive your "Campsite Occupied" sign.

FLEA MARKET - Spaces not available until Sunday, August 25th. The Shelby Amateur Radio club reserves the right to limit the amount of flea market space. Flea market space cannot be reserved, is on a first-come basis, and is not transferable. **CHARGES:** One admission ticket for a 10-foot space. Tickets must be purchased before occupying space. Gates open at 0600 Saturday and Sunday. **VENDORS** - Requiring tent spaces, contact Bobby Fisher, AB4OE, (704) 937-9697.

ACTIVITIES - To be held in tent just below Fire Station. Sunday School sunday morning at 10:00. bingo for ladies following sunday school.

FORUMS - To be held in the fire Station's meeting room on Saturday: 10:00 - ARRL Forum by John Kanode, N4MM, Roanoke Division Director - 11:00 MARS forum by Bob Vardeman, W4VRI - 13:00 DXCC/DXAC forum by Gary Dixon, K4MQG, DXCC Advisory Committee - 14:00 DXing For the Beginner - WN4BBJ.

FREE PARKING - Across road from Entrance on paved lighted lot. HANDICAPPED & TAILGATERS use gate near intersection of Hwy. 74 Business and Hwy. 180

NOTE - No X-rated Material to be displayed or sold. No Guns or any other type of weapons permitted at hamfest.

TALK-IN ON 146.28/88 - HAMFEST INFO LINE (After Aug. 25) - Direct line to Hamfest Site: (704) 480-6928

TALK-IN ON 146.28/88 - HAMFEST INFO LINE (After Aug. 25) - Direct line to Hamfest Site: (704) 480-6928

Some of the motels in the area are listed below. They recommend that you call well in advance - reservations may be a problem.

RU-8-96

How to coordinate a repeater

-written by Don Williams, WA4K
SERA Vice-President and Vice-Director, Virginia

"I just bought a repeater from John Doe and want to get a frequency pair coordinated. How do I do this?"

Although we would like you to have a very good idea that you will actually be able to get a frequency pair before you have spent hundreds or thousands of dollars for your repeater, we realize that this is not always possible.

Remember that you must coordinate not only a repeater, but according to POLICY 2 of the Coordination Policy and Guidelines (CP&G), you must also coordinate link, control, and auxiliary station frequencies.

Your first step is to contact your repeater coordinator. His mailing address, telephone numbers, and e-mail address are listed on the SERA web site or page 1 of this magazine.

Request the SERA Frequency Coordination Package. The frequency coordination package should have the following enclosures:

1. SERA Form 03, Application for Frequency Coordination, Revised July, 1995 (four pages)

2. A copy of the Coordination Policy and Guidelines, (CP&G) Latest Revision July, 1995 (six pages)

3. A copy of the 1995 SERA VHF/UHF Frequency Utilization Plans (FUP) (two pages), which is usually part of the CP&G

When you receive this package from your coordinator, read the CP&G very carefully. Make sure you understand it and are aware of important parts which affect your application and future coordination. There is also helpful information available at the SERA Worldwide Web site:

<http://www.wku.edu/~martija/sera.html>

After acquiring a reasonable understanding of what is required, you can then proceed to the Frequency Utilization Plan. Upon determining what frequencies you can utilize, use a copy of the SERA Official Repeater Index in the latest edition of the SERA Repeater Journal to determine a primary and an alternate frequency pair which may be able to be coordinated for your system. This index is updated quarterly, approximately fifteen days

prior to publication date of the Repeater Journal.

Remember to check POLICY 5, Repeater Coordination Parameters, again to be sure what the suggested distance separation is for your particular frequency pair. Under normal circumstances, the coordinator would follow these suggested distances for co-channel and adjacent-channel separation.

However, in some cases these distances may be adjusted, as described in POLICY 6, Repeater Distance Variance. Some coordinators have a district policy which requires that letters of permission be granted by affected trustees in case of distance variations which may possibly cause interference. Many SERA coordinators have at their disposal sophisticated communications engineering software which can help them to analyze potential problems with the coverage of a repeater. Much of this analysis cannot take place until the coordinator receives your completed application.

The Height Above Average Terrain (HAAT) will determine what the SERA policy recommends as the maximum Effective Radiated Power (ERP) for your repeater.

Repeater Power Limitations are shown in POLICY 7. We do not honor coordination requests for ERP levels which fall outside these parameters.

Every blank on this SERA Form 03 must be filled in. If data is not required or is not applicable for a blank space, please fill in that space with the letters, "N/A." PLEASE NOTE that we require a published map or clear photocopy showing the location of the repeater. USGS 7 1/2 minute topographical maps are preferred for this purpose, as it is necessary to locate your repeater site to the nearest second of latitude and longitude (approximately 100 feet). If you have access to a GPS (Geostationary Positioning Satellite) receiver, or know someone who does, please feel free to use readings from that device to determine your coordinates.

The only acceptable Application for Frequency Coordination is the one which says, "SERA Form 03, Revised July, 1995."

PAGE ONE:

City/Town:

This should list the nearest city, town, or village shown on a map. Do NOT name a

mountain in this blank.

Location Specifics:

Although the instructions on the form ask for a description of your site showing measured distances from at least two (2) points and containing a horizontal error of not more than 1,000 feet, we prefer that you describe it much more accurately than that. This space can be used also to name a mountain peak if applicable.

Transmitter and receiver coordinates:

Most important about this section is that you MUST list your coordinates to an accuracy of one second. Minutes and seconds must be LESS than 60. This means that minutes may not start with a number larger than an integer of 59, and seconds must not start with a number larger than 59 with decimals to two places. Although the internationally-accepted method of showing west longitude would show a negative (-) number, it is not required on this form. Should you elect to use decimal degrees, coordinates must be stated to four decimal places only (no minutes or seconds). We prefer that you convert your coordinates to degrees, minutes, and seconds if you have acquired them in another form. In the southeastern part of the United States, your coordinates will probably fall between 75 and 92 degrees west longitude and 24 and 41 degrees north latitude. This is an area from eastern Virginia to western Mississippi and from south Florida to northern West Virginia.

Repeater Callsign:

This should be the callsign you plan to place on the i.d. of the repeater.

Repeater Directories Listing:

This is how your machine will be listed in the Repeater Journal and the ARRL Repeater Directory.

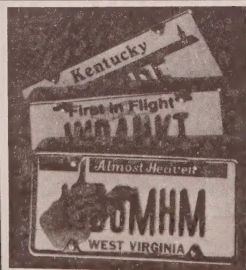

Trustee, sponsor, holder of record, and person responsible for answering correspondence:

All this information is very important and must be filled in.

PAGE TWO:

Everything on this page is self-explanatory and includes references. The one part of this page which needs to be emphasized is that if you choose some access method other than carrier, you should be aware that there is no FCC regulation which prevents you from having a closed repeater. However, SERA does

How to coordinate a repeater

(Continued from Page 6)

not recommend closed repeaters because they prevent full utilization of spectrum which is already very crowded. If you decide to have toneburst, DTMF, or CTCSS access, please consider making those access codes available to anyone who wishes access in your area.

General Information:

Under "Publish Tone?," be sure to circle Yes, No, or Not Applicable

PAGE THREE:

Some coordinators may be able to assist you in determining your Average Ground Elevation. Be sure to ask if help is available. If your coordinator is able to assist you, calculations will not be necessary, because engineering software can calculate HAAT from the exact (one-second) coordinates of your repeater site.

PAGE FOUR:

This page enables you to determine your ERP, using the following information:

1. Transmitting Frequency Band
2. Transmitter Output Power
3. Antenna Gain
4. Type of Feed Line
5. Length of Feed Line
6. Duplexer Insertion Loss

SYSTEM GAINS:

Probably the most confusing part of the process on this page for many is the conversion between Watts and dBW. Remember to take (1.) Transmitter Output Power (in Watts) and convert it to dBW using Table 1 at the bottom left of the page. For example, if your repeater will have a transmitter output power of 45 watts, the chart converts this to 16.5 dBW. 15 Watts would convert to 11.8 dBW. This information will be used in the section called "SYSTEM GAINS."

SYSTEM LOSSES:

Even if you have a chart from your feedline manufacturer, please use the Table II at the bottom right of the page to determine the loss in dB. This chart includes factors for connector losses and other factors used by Motorola. Two samples of calculations follow: 150 feet of feedline divided by 100 is 1.5. Then multiply 1.5 times the loss per 100 feet from the table. If your band is 144 MHz and your feedline is RG-8 (9913 type), this would be 1.5 times 1.3, for a cable loss of 1.95 dB. Your duplexer insertion loss is then added to this number to determine total System Loss.

Next, subtract system losses from system gains to determine ERP in dBW. When you

finally get this ERP in dBW calculated, use Table I to calculate the ERP. If your ERP in dBW is 19.6, the ERP would be rounded up to 100 Watts. If your ERP in dBW is 15.5, the ERP would be rounded up to 40 Watts. This is the ERP which is transferred to page two (2) of the Application.

Last of all, transfer Power, Antenna Pattern, Ground HAMSL, Ground HAAT to the blanks at the top of page two, and fill in the certification section at the bottom of the page. This section provides signature blocks for the Trustee printed name, call sign and signature; and a club officer printed name, call sign, title and signature (if the repeater is sponsored by a club).

REMEMBER: The Holder of Record is considered the OWNER of the repeater, so be sure to carefully consider how you fill in the blanks for Sponsor and Trustee at the bottom of pages one and two of SERA Form 03.

WHAT TO DO UPON COMPLETION OF THE APPLICATION FOR FREQUENCY COORDINATION

You have now completed everything you have to do except (in the case of those districts which use them) for obtaining letters from repeater trustees who may be affected by departures from the recommended distances set by SERA POLICY 5.

The application and letters of permission from affected trustees (if any) must be submitted to the coordinator for commencement of the approval process. The coordinator, upon receipt of your application, examines it to determine that all blanks are filled in properly, necessary attachments are included, and that everything complies with the Coordination Policy and Guidelines (CP&G) and the Frequency Utilization Plan (FUP).

Your frequency coordinator then sends out a form called the Notice of Proposed Coordination (NoPC) to all adjacent coordinators who might have areas affected by a coordination on your requested frequencies. Those adjacent coordinators have 30 days in which to respond to the notice, sending notices of frequency denial with explanations if warranted. If no adjacent districts or councils object to the proposed coordination, you should receive a coordination approximately five to six weeks after your application is received by your frequency coordinator.

The Frequency Coordinator then sends you SERA Form 05 (Revised 6/20/93), Notice of Frequency Assignment. This is your coordination.

Along with this form, you also should receive SERA Form 09 (Adopted 8/15/93), Report of Repeater Status. This is a multi-purpose form which is used to let the coordinator know when you place your repeater on the air, that you did not place the repeater into operation, or that you request a (one-time) six-month extension.

You can also request SERA Form 09 from your frequency coordinator if you:

1. Take the repeater out of service temporarily (See POLICY 13 - Trustee Responsibility). You have only ten days grace period in which to notify the coordinator if your repeater is going to be out of service.
2. Take the repeater out of service permanently.
3. Make changes to the repeater which would require recoordination.

How long do I have to get my repeater on the air in its full coordinated profile, with full ERP and at its coordinated location?

SERA POLICY 17 states that the holder of the coordination has six months in which to get the repeater up and running. Should the repeater not make it by the six months dead-

line, the coordination deadline can be extended for one more six months period, after which the repeater must be re-coordinated by going through the process of coordination on a new Form 03.

Here are the official SERA Forms

- SERA Form 02
Frequency Coordination Package Transmittal (Mailed by frequency coordinator)
- SERA Form 03
Application for Frequency Coordination (Included with Form 02 and submitted by applicant)
- SERA Form 04
Notice of Proposed Coordination (Mailed by frequency coordinator)
- SERA Form 05
Notice of Frequency Assignment (Mailed by frequency coordinator)
- SERA Form 06
Retraction of Frequency Assignment (Mailed by frequency coordinator)
- SERA Form 07
Notice of Frequency Denial (Mailed by frequency coordinator)
- SERA Form 08
Notice of Frequency Non-Use (Mailed by frequency coordinator)
- SERA Form 09
Report of Repeater Status (Included with form 05 and submitted by applicant)

If you have any questions concerning coordination, interference, or how to get your machine up and running on a coordinated frequency, contact your local SERA State Director.

The SERA Coordination Policy and Guidelines, as well as all Frequency Utilization plans and much other valuable information is posted on the SERA WEB Page. You are invited to visit.

Computerized forms for SERA?

If several Directors of have their way, all SERA forms, including coordination forms could be electronically generated.

After much discussion of the various forms SERA Coordinators use in their everyday job, it was desired a committee to study the feasibility of what is needed in the future should be formed.

President Dave Shiplett, AC4MU named: Bill Jones, N4MNH, SC Director; Dick Fowler, N8FMD, WV Director; Jeff Martin, N5KOL, KY Director; Stu Sims, N4MXC, GA Director; and Tim Berry, WB4GBI, TN Vice-Director to work on the forms in conjunction with David Ward, KA4LVO, our computer manager. They will report back at the Winter meeting.

Happy 25th Anniversary

Special to the Journal by Linda Tate, AC4CJ

This article is dedicated in loving memory to Art Madeley (formerly W4HOT), who was the chief engineer of Channel 3, until his death. He was supportive of our quest to supply an amateur radio system to be used for emergency communications.

On June 8, 1996 on a beautiful Saturday afternoon in Wilmington, N. C., (80) hams and guests gathered at Hugh McRae Park to celebrate (25) years of excellent communications.

Good food and great fellowship was enjoyed by all. Ella Porter, KA4PAY supplied a delicious homemade Anniversary Cake.

Special guests were Danny Hampton, KM4OX, (now again K4ITL) who is the "father of the technology" of our repeater system. He spoke of the last 25 years remembering the first time he came to our aid.

Reed Whitten, AB4W, our ARRL Section Manager, presented special service certificates to the original (7) members, as well as, special recognition to the (3) engineers who have been the backbone of our club. David Demos, KC4YAM, Dan Sullivan, K4GRI, and Elliot Hunter, WB4UNG.

David Demos, KC4YAM accepted a certificate for WWAY TV-3. Reed also presented certificates to Ella Porter, KA4PAY and Eddie Sellers, W4NTQ.

Rick Tharrington, KD4JRX, Sky Warn Representative, presented a special certificate to the weather bureau.

WWAY-TV-3 and the Amateur Radio Community have enjoyed an excellent relationship over the past 25 years in providing communications in times of emergency for the welfare of the general public. Also using our 22-82 repeater to provide "Sky Warn" to the National Weather Service allowing them to receive reports from amateur radio operators acting as weather spotters throughout Southeastern N. C. and Northeastern S. C.

ON THE COVER

Our cover this issue covers the 25th Anniversary of the Wilmington VHF Association during their special celebration last June. The large photo by Jerry Tate, K4GMP shows the 2,000-foot WWAY TV-3 tower, home of the club's repeaters. The insets were shot by Chris Spell, KD4PSX. One is of Reed Whitten, AB4W, ARRL SM, and Danny Hampton, K4ITL, SERA NC Director, special guests. The other photo shows three of the five original persons who got together in 1971 to build the first repeater in Wilmington. Jerry Tate, K4GMP, Dan Sullivan, K4GRI, and Elliot Hunter, WB4UNG are shown. Not present in the picture were Ralph Foy, WB4TVD and Duncan McFadyen, WA4KBP.

Our History in Brief

In 1971, five Amateur Radio Operators met at the Wilmington, NC, channel 3 studios to discuss building the first 2-meter repeater for the Wilmington area. In those days, there only a few repeaters of this kind anywhere.

Elliot Hunter, WB4UNG; Dan Sullivan, K4GRI; Duncan McFadyen, WA4KBP; Ralph Foy, WB4TVD; and Jerry Tate, K4GMP were the first. Then Ed Rusher, WA4LED and Herman Brock, K4JQJ joined the group shortly thereafter. The first repeater was built in Herman's garage in 1971.

Our club was the first in Wilmington to have a 2 meter repeater. Our second generation machine was a GE Progress Line purchased from Bill Taylor, KD4IL from Charlotte (a former Wilmington boy). This repeater served us well for ten years.

In 1981, the Channel 3, TV tower which we had our repeater located was knocked down when a USAF F-105 Jet hit it. When we had to replace anten-

nas and everything else, we replaced the repeater with a GE Master II series machine built by Danny Hampton, K4ITL and his supporting group.

The equipment still remains with modifications made through the years, continues to work for us. At one point, we had over 87,000 hours of use with practically no maintenance or down time. Today 14 years later, it still works fine.

The club was organized in 1971 and has grown to over 200 members. The club owns and operates (9) systems - (3) repeaters, digital packet nodes, and BBS). We were without 22-82 from January 1981 until August of 1983 because of the downed tower. We had use of our local low level repeater (13-73). It has served us well and during that down time. We added an auto patch to 13-73 back then.

Our 146.820 and 444.850 repeaters are some of the tallest above ground level (agl) in the Eastern U. S.

146.82 repeater cabinet - 1850'

Join SERA - get the Repeater Journal !!

Join hundreds of your ham friends who support the SouthEastern Repeater, Association, Inc. (SERA), the local Non-Profit Frequency Coordinating organization - made up of repeater owners and repeater users in NC, SC, TN, WV, KY, GA, MS & VA. Along with your membership you get free, the award winning *Repeater Journal* every quarter - February, May, August and November. SERA has worked hard for 25 years to keep our VHF/UHF bands working - your financial support of this great organization will enable us to continue this work.

Fill out the application below and mail with personal check to:

SERA MEMBERSHIP P.O. BOX 215 TOBACCOVILLE, NC 27050

Your *Repeater Journal* will start with the next quarterly issue if application received prior to quarterly deadlines of: Jan. 15, Apr. 15, Jul. 15 & Oct 15

SERA 2000 Committee issues report

-by Stu Sims, N4MXX, Chairman
and SERA Georgia Director

After meeting with David Ward, SERA Data Base Manager in May, the SERA 2000 Committee became better acquainted with our records keeping and database management procedures. Our goal was to determine if there were things we needed to improve to better serve our membership and improve our coordination processing.

We found directors and coordinators desired a means for electronic data transfer, electronic forms, possibly a reduction in paperwork, and more flexibility within database use. Some directors and coordinators expressed a desire for the capability to produce listings or display unique or specific information based on an ad hoc data retrieval or query.

In reviewing the computer expertise, available computer equipment in use with SERA, and existing framework that some of things were indeed possible. Rather than attempt to implement all facets of this wish list at the same time . . . we would better serve the organization by prioritizing matters and taking a step at time.

While a general game plan was tentatively established within the committee, we decided the logical place to

was by looking at database matters.

Our centralized master database system continues to be a SERA strong point and the committee found it does its intended job and tasking exceptionally well. The database and David Ward continue to serve the organization and its membership well. We found the present database software language (originally designed to be utilized on a main-frame computer and it is written in COBOL) to be a somewhat limiting factor. The language or software platform means a specific software routine must be written for each desired data or information retrieval task including one time requirements. This limitation affects flexibility in field user (director, coordinator) use and, as our COBOL experience is limited, maintenance capabilities.

The committee found while the database performs well and contains the data needed to accomplish coordination actions . . . it does not directly support coordination actions. The committee also found the database manager was placed in an untenable position of receiving suggestions and requests for changes to the database system from multiple sources.

HOWEVER, the committee noted that the database manager had NEVER been TASKED to develop or alter the database routines to directly support coordination actions . . . the database system was designed only to accomplish the administrative functions of membership and repeater listing. And, it does these jobs extremely well!!!

The committee's first report to the Board of Directors during the June 29-30 meeting recommended:

- (1) character delimited files of all database tables be provided for director and coordinator use within whatever software platform they desire,
- (2) these files be made periodically available for secure electronic transfer,
- (3) the directors and coordinators provide the committee with their desires and requirements for an integrated software application for coordination actions, and
- (4) suggestions, directions and requests for changes to the current SERA database routines only be directed to the database manager through/by the SERA 2000 committee or by the specific vote of the Board of Directors.

The Board approved the committee's recommendations and directed Dave Shiplett, SERA President, to issue directions to implement the recommended actions. The committee is to continue with the goal of developing an integrated database and forms production application which will accomplish coordination actions and maintain the required paperwork audit trail.

The inputs from the directors and coordinators are to be utilized to establish the framework of the application and determine the software platform. The committee will continue to work with the database manager to determine the best methodology to use to complement and support our existing system when the coordinators and directors transition to the new application. The end result should be better service to both the organization, the amateur community, and, more importantly, our members well into the year 2000.

The W4NC great county chase

Special to the Repeater Journal
- by Henry Heidtmann, N4VHK

So, you are looking for something to do this weekend? Why not load an RV with radio gear, food, five passengers and an HF vertical and take a leisurely drive through all 100 counties of the state of North Carolina?

By the way, give yourself a couple days.

Like three . . . !

This was exactly what several members of the Forsyth ARC of Winston-Salem, NC decided to do. Of course, it was not a spur of the moment sort of trip, but rather a planned journey to help raise funds for a new tower installation at the W4NC club station.

The trip was designed to raise awareness of the ways in which the local hams serve the community, as well as act as a public relations tool to help members of the club solicit funds from family and friends to help finance some much needed equipment at our station. Each member was asked to collect 5 pledges in the amount of 1 cent per mile driven during our "DXpedition," of sorts. This would amount to to five \$22.00 pledges, as the trip was estimated to be about 2,200 miles in all. The trip proved to be successful in the fund raising sense, but also was the source of quite a few interesting stories along the way.

The initial idea for the chase was born at one of the after-meeting meetings at a local pizza parlor in Winston-Salem. While hovering over a large sheet of Spinach Foggia

(that's spinach pizza to the unanointed one who has never tried it), myself, Don Edwards, WB4KQN, Hal Garrison, KQ4LO, John Kippe, N0KTY, Bill Patterson, KD4RGB and Club President Melissa Hall, KD4VED were discussing a way to enable the club to properly install and outfit a new tower that was recently acquired from a local business. Money was tight, as our annual hamfest was looming, and we had to find a way to raise funds without calling for the dreaded dues increase.

After several options were tossed around, the idea of the chase came to mind. This was the result of someone mentioning the North Carolina QSO Party, which was being revived, and the possibility of driving through all 100 counties during the contest. Later research showed that this type of trip during the QSO Party would not help us in terms of points, but the idea stuck, and after much consideration, a presentation was made to the Board of Directors of the club.

After some discussion, the Board approved the function, and the W4NC Great County Chase was born. Now keep in mind that as far as we know, only Charles Kuralt of CBS fame has attempted this type of trip, but he took over a month to do it, and all of us willing to take the ride were not lottery winners. Also, I was married with child, which would not help my plea to be gone for a month in a motor home playing ham radio.

After several planning sessions, the

details had been forged. We would leave the Red Cross Chapter House, the home of our club station at 6 PM, Friday, April 26. We would rent an RV, purchase a mobile vertical antenna, get 5 volunteers, go shopping, install radios, and take the plunge.

The call went out to county chasers across the country, while club members starting soliciting pledges. TV, radio and print media were alerted, as well as the major ham magazines. A crew was picked, and after a few weeks a change was made due to one of the crew members having to pull out at the last second because of a flight school class.

The chase team secured (rented) a 21-foot Winnebago RV from a local dealer and promptly outfitted it with a High Sierra HS-1000 vertical, our Club HF Kenwood TS-690, a 2M rig and antenna, microphones, headphones, log books, tools, a spare TS-430 rig and about everything else we might need.

As TV cameras rolled, we left the Red Cross building at 6:01 PM amid news media, several well wishers, including family members and club members.

Sparky, KE4TES and Steve, KG5LH who would serve as our tracking team from home were also watching us drive off.

Now it was time to get down to business. 80-Meters seemed to be the most active band, so I tried it, but coming out of the radio was a terrible whine of engine noise. It seems we forgot to test the rig WHILE MOVING.

Don, much to my relief went to work placing toroids at several key places and soon the RFI disappeared and I began hearing several club members calling us on 80.

Our first county contact was in the log book. Then as we moved to our second and third counties we were being called by stations in Virginia, New Jersey as well as North Carolina. WB9OOG from Halifax, VA was right on our tail, and as we announced each of our next 12 counties, he was there to work us. Band conditions deteriorated over the next six hours and we lost him.

As we traveled, we checked into the Tarheel emergency net on 3923 and told many operators around the state about our trip, and talked to some of our club members or friends back home.

As we went through the Raleigh/Durham area, we had a nice lengthy chat with several hams on local repeaters. Throughout the first night, our travel schedule took us through the northeast corner of the state. 80-meters continued to be the band of choice as we checked into the 3905 Century Club net. As the early morning hours rolled on, most of the bands started to drop off.

Throughout most of the northeastern counties, we turned our sights toward reaching Dare county and the coast for sunrise. It was 5:45 AM when we caught a view that none of us on the trip had ever seen before: The Wright Brothers Monument at sunrise. A magnificent marble block dimly lit with a combination of spotlights and sunlight, the memorial stands several hundred feet up on a hill where the famed brothers made their historic first flight.

After brief stops at an oceanfront hotel to view the ocean, the chase vehicle started its long trip inland. We switched to 40 meters, and checked into the Alligator Net at 8:00 AM. Several more stations were worked on 40,

The W4NC great county chase - road trip of the year

(Continued from Page 12)

then 20-meters was tried. We made a contact with a midwest station, and he reported a problem in our audio. After several minutes of checking, we concluded that there was RF getting into the audio state of the rig through the mic line. "Toroid Don" Edwards jumped on the problem, and soon the audio was better. We are still convinced that our RV just happened to have a resonant frequency of 14.2 MHz!

Later that morning we were driving through a portion of Craven County when someone noticed a VOA sign pointing off the main highway. Being hams, we were all intrigued. Soon we were met with a site that would make any ham green with envy. We had stumbled upon the "B" site of the Voice of America. This is a place with an antenna farm that stretches for miles. Bobtail curtains hanging on 300-foot square steel frames and feed-line and ground systems that went on forever. We found out later, after driving around the place, it has been decommissioned recently by the government. (Boy what a yard sale possibility!!!)

Saturday afternoon brought very noisy conditions on all bands, so we decided it's time to try some CW. We looked through the equipment box for the key . . .

Ooops . . . !

No key. We thought a while, then jumped on the local repeater in the Wilmington area and asked where the closest Radio Shack was. Later, we picked up our parts and stuff needed for Don to build us up a little key. After a little soldering and fudging, Don was soon working a flurry of 20-meter contacts. Long live Morse Code!

Saturday evening, we stopped at a rest area to enjoy a meal without moving, provided by don, which was a nice change of pace. We had reached 50 counties and had been on the road for exactly 24 hours.

After dinner, Don worked many stations on 20 SSB, including Alaska, Canada and Columbia. We put down lots of Nebraska contacts in the logbook - it was their QSO Party weekend.

It was great to hear Don tearing off 20 meter contacts at a rate that would make many contesters jealous, but the run waned out at about 11 PM. We decided to give the generator and the crew a good rest for the night.

Sunday morning came, and we were rested and ready to take on a day which would include driving the RV through the toughest portion of our ride: the Blue Ridge Mts.

First we had to drop off Dave, one of our crew, at a Shoney's restaurant in Elkin. My wife and son were also going to be there, and it gave us a chance to have another sit down meal. We were to meet them around 9:30 AM, so we still had time to do a bit of operating. On 40, we worked three Massachusetts stations, then I decided to take a quick shot on 20 as we pulled into Elkin.

On a seemingly dead band, I turned across a strong " . . . Juliet Zulu, QRZ?"

I called, "W4NC, Whiskey Four Nancy Charlie, Mobile . . ."

"Nancy Charlie station, you are five-nine, come again."

I gave that station a hearty five-nine and asked for his call sign.

"QSL, thank you for the five nine from Radio One Fox Juliet Zulu."

I raced to the prefix chart in the back of the log to confirm what I believed to be our best contact yet. We got a 5-9 from Franz Joseph Land!!! And we were mobile! My shouting woke up one of our crew, and startled the driver, but it was all worth it. We WILL QSL that one.

After a nice breakfast, the chase vehicle moved into the Blue Ridge mountains. Since we were climbing to some good altitudes, we gave 6 meters a shot. Several contacts on 52.525 were logged, and a 10 meter ground-wave contact was made back to Bill, W4MDD in Winston-Salem.

We were 71 counties into the trip, and now that we were one man down from our schedule, things got a little tense. We had been used to driving on flat back roads, and interstates, and now we were faced with constant "S" curve roads, 25 MPH speed limits and limited view of oncoming traffic. Suddenly, radio seemed secondary as Bill, KD4RGB skillfully guided our 21-foot albatross through some real nightmare roads. Bill got us through, but we know that his was only the beginning.

40 and 20 meters netted us some nice contacts that afternoon including several special event stations. As we passed through the Asheville area, our only tie to Winston-Salem disappeared with the 145.49 Green Mt. machine fell out of range. The roads began to get rough again, and we decided to stop at a Cherokee County rest stop to have a quiet dinner consisting of a recently purchased frozen pizza. (don had made a homemade pizza, but gravity had caused it to hit the floor during the preparation in a moving vehicle. It really smelled good, too.)

With 89 counties behind us, the chase started on its final eastward run towards home as we rolled out of the rest stop.

Several more contacts were logged on 20, but it was clearly evident that the bands were dropping off, and we were all tired.

The schedule that had kept us all fresh was disrupted with only 4 people, and to add to the frustration, bill was suddenly faced with "S" curves and 15 MPH mountain climbing again. We were tucked deep in the Nantahala Mountain range, and only able to traverse the next 30 miles in about 2 hours.

We did have a bright spot though. We found a group of hams on 80 meters who were having a "Trivia Net." It was entertaining, funny, and we all had a good laugh listening to the banter after each question. Thanks to all of those guys, whoever you all were.

It was 4:45 AM when we signed on to the BBC (Before Breakfast Club) net and announced that we had just crossed into Davidson County, number 100! We were all up now, and about 45 minutes later we pulled into the Red Cross parking lot.

100 counties in 56 hours . . . ten hours ahead of the computer projection. Our trusty trackers Sparky and Mark met us at the door and welcomed us back. A few minutes later we were all going home to a good night's (or day's) sleep in our own beds.

Well, that's the story. The W4NC Great county chase was a one of a kind event that probably will not be repeated anytime soon. It was fun, but also very demanding on all of us as drivers and amateur radio operators. Staying up for 48 hours at CQWW SSB seemed a lot easier to do. Yet, our mission was to help raise funds for our club. The trip helped spread the news about our fund drive, and also spread a great deal of amateur radio good cheer.

Thanks to the members of the club, as well as all the people who donated to our cause - Hams and non-hams alike -- our new tower should be up and helping the local, regional and national communities by the end of the summer.

That's what it's all about; helping others, and having a good time.

What a great hobby!

WEST ANTENNA CORP. - YOUR SOURCE FOR ROHN TOWERS AND ACCESSORIES

BOOSTER PACS

Hey!!! The power is off! Why didn't I build up that battery pack I have been going to do for years? Now I don't have an emergency battery supply for my 2-meter or 440 rig.

This is exactly what happens when there is a power failure. We all have been thinking or going to build something like this for years, but we haven't. We didn't have the tools to make a wooden box or some other container. Then how do we make connections to the battery that will be quick and easy to use?

Now there is a quick and easy solution to this problem!

BOOSTER PAC

The Booster Pac is not only good for an emergency power supply but has enough power to jump off your car or truck. The Booster Pac can also be used with an inverter to run low power 120 vac equipment

**Do not confuse Booster Pac
with other cheaper packs on the market!**

Booster Pac Battery Data

The batteries in the Booster Pac are jell lead-acid type and will not spill when turned over. Batteries will work in any position. They have heavy duty copper jumper leads and battery clips. They also have a cigarette lighter jack on the side of pack with a rubber dust cover.

Both battery packs have a test switch that will show the percentage of charge remaining in the battery as well as full charge indicator shown on the led display. The cigarette lighter jack has a 12 amp automatic resetting circuit breaker.

OTHER NEW ITEMS FROM WEST ANTENNA

CAST IRON COUNTER WEIGHTS - manufactured by West Antenna primarily for the commercial tower installers to get hand lines down tall towers are now available to hams. These 9 and 24-pound iron balls with eye rings are ideal for hanging on the ends of dipoles strung through trees to help prevent the wire from breaking in a high wind when the trees sway in opposite directions. They are available in high visibility orange or nearly invisible black. Please specify color when ordering.

RS-400 9-lb. iron ball - \$20.00 RS-550 - 24-lb iron ball - \$38.00

West Antenna still carries all the other items listed in our previous ads. which include - Rohn Towers, PolyPhaser lighting protectors, circuit breakers, fuses, fuse holders, rope, etc. See ads in earlier editions. *Call us for information and for your needs.*

Booster Pac Models

West Virginia Notes - by Barbara Marsh

KB8GGG- 126 UP LEFT FORK ROAD, SHADY SPRING, WV 25918

Editor's Note: Barbara Marsh, KB8GGG begins her coverage of West Virginia this issue for the Repeater Journal in the interim of the absence of Ted Wolfe, WD4KHL who is sick. Join with me in wishing Ted the best, and much luck to Barbara. Your assistance in providing news to her is solicited. Welcome aboard the Journal Barbara!

-Wayne C. Williams, K4MOB, Editor

I want to share the following letter with everyone!

108 Heartland of Charleston
3819 Chesterfield Avenue
Charleston, WV 25304
10 July 1996

Barbara A.L. Marsh - KB8GGG
126 Up Left Fork Road
Shady Spring, WV 25918

Hi Barbara,

Hope you can read my writing. I noted from the last SERA Journal that you are my temporary replacement - alas it will probably be permanent - as West Virginia SERA correspondent.

Although I've never met you personally, we did talk frequently on 2 meters, so I am pleased that someone I am acquainted with got the job. Good luck and God be with you.

I am ambulatory here. Will have had my sixth and final chemo-therapy session the last of June.

I have lymphoma, or cancer of the blood cells. I will be late July after a bone marrow test before we know if the treatment is successful.

The best to you, SERA and the other hams I know in the Beckley area. Remember me to them.

Sincerely,
Ted Wolfe -WD4KHL

This beautiful letter was awaiting on our return from the Bluefield Hamfest and after the warm welcome we had received from Wayne Williams - K4MOB, Journal editor, and Don Williams - WA4K, SERA vice president, I felt truly blessed.

Now, however, I need HELP!

I'll get by with a little help from my friends are the words of a song but express my feelings so well. I will attempt to correlate news and views from all West Virginia amateurs, but I first must receive the information. So please, everyone send me copies of club newsletters, minutes of meetings, announcements etc.

Now back to the Bluefield Hamfest. It has always been to us more like a family reunion than a buy, sell or swap show. This year was no exception with greeting friends from North Carolina, Virginia and all parts of West Virginia. It is a treat to see Dortha - N4SHE and Delbert - AB4TH of North Carolina as well as many members of the Giles Amateur Radio Club, the Appalachian Repeater Association, Plateau ARC, Black Diamond ARC, Summers County ARC and oodles of others.

We wish to congratulate Ed Davis - N8OLH, winner of the DR 130 Alnico radio; Scott Hodges - KC8ECA, winner of the DJ180 Alnico HT, and Roy Moore - KB8ZSG, winner of the 20 amp Astron power supply. And big congratulations to the members of East River ARC for hosting another successful hamfest in a new location. Personally, we like Graham Middle School better than Brush Fork Armory.

NEW REPEATERS - WB8YST, Jim Mangus Jr. of Charleston has a great sounding 6 meter repeater operating on 52.590/53.590, located on Mann Mt. near Layland in Fayette County.

We monitor activities with our scanner and it seems to be very popular.

WA8YWO Michael Tyler of Richwood is the trustee of 147.750/147.150 located on Grasshopper Knob, north of Richwood. This repeater had been coordinated in October 1995 on 147.330, but due to interference with another machine in Virginia, the frequency was changed and granted in May 1996.

N8SNW Allen Auvil of Iaeger put 146.055/146.655 on the air 13 April with the repeater located on Pine Knob, south of Iaeger.

N8TNB Marvin Brown's call sign will identify the 144.770/145.370 repeater sponsored by the Black Diamond ARC. This repeater was put on the air in October 1981 with the cooperation of the Raleigh County E.O.C. and was maintained in the Beckley City Police Department building.

A new federal building will be constructed

on the land where the current E-911 tower is located. This tower has been moved to a new location about 64 miles west and the repeater and antenna will be installed there when completed.

Ralph Langley of Hurricane, trustee for 147.750/147.150 which first went on the air in August 1985 had to be moved 14 miles east and through lack of cooperation with an Ohio co-channel user, the frequency was changed. Last December the repeater was moved to Culloden and the frequency changed to 147.405/146.805.

Lambert Knob, south of Pineville, will be the location for 147.885/147.285 repeater with **Greg Sluss - AA8BS** of Pineville as trustee.

Frequency pair 146.475/147.050 was granted 4 June 1996 to **Steven King - N8TXQ** for a new repeater to be located on Workman's Knob, South Madison. Adjacent channel at Phelps, KY and Gallipolis, OH both have +600 inputs.

Six meters is becoming active with a new repeater on 52.190/53.190 sponsored by the **Black Diamond ARC** to be installed on **Keeney Knob, Alderson**. The machine with call sign **WA8WDK Bill Elkin** is under construction.

On 19 Jan. the Southern West Virginia Amateur Radio Association members were called upon to provide communications and assistance for emergency services when the rivers and streams flooded. The club's communications center and mobile trailer were manned by members who provided interlinks between the National Guard, Office of Emergency Services and the Red Cross during the next four days. Volunteers were alerted by **ARES District Emergency Coordinator Bob Sims W8KBM** and **EC's for Greenbrier County: Paul Herr - KD8WY, Herb Montgomery - KF8ZH, Dave Bleil - NY8G, Leonard Osbornes - N8DIS** and **Calvin Christian - KB8LPP**.

New officers elected to serve this year are president, **Aaron Moody - KG8BR**, vice president, **Connie Johnston - KB8TEI** and secretary/treasurer, **Todd Fenstermacher - KB8OUU**.

Trustees are **Paul Herr** and **Herb Montgomery**. The club sponsors the 146.730 repeater on **Keeney Knob, near Alderson**.

We did not participate in Field Day this year but did monitor 2 meter conversations over various area repeaters. Severe thunderstorms caused most groups to close down the operations for several hours during the night and perhaps this will cause total contact points to be lower this year.

John Hymes - WB8CJG and his wife **Cathy KB8MQN** were attending the wedding of a daughter and also missed the event. However John did loan his pickup truck and much ham equipment to the Plateau ARC and **Black Diamond ARC** combined Field Day weekend. These clubs set antennas and radios up at Burnside Park, which is located at the north end of the New River Gorge Bridge at Fayetteville.

This is really a family oriented weekend with moms, dads and children all eager to participate. The serious "Hams" had plenty of opportunities to talk over the four stations and we heard a rumor that a contact was even made with a maritime mobile - a Submarine. Hope they can get a QSL card confirmation.

News from
East Kentucky
- by Fred Jones WA4SWF
511 LACKEY AVE. LOUISA, KY 41230

We all miss Ted Wolfe, WD4KHL and his WV Notes column. He was our way of getting some information concerning Eastern Kentucky in the Repeater Journal. I do not think at this time anyone is sending anything in about our area.

At our next club meeting, I will be showing copies of the SERA 1996 Data and Source Directory and tell them how they can order copies and how to join SERA and get the Journal.

Louisa, has the 147.39 N8QCW repeater on the air, with a Friendship net on Thursday nights at 9:00 PM. The Big Sandy Amateur Radio Club was just formed last May and has some 28 members. We plan to be giving some packet demos at some of the club meetings, and tell them about our two packet nodes.

Grayson, the 146.70 KF4JO repeater has their ARES net every Monday night at 9:00 pm.

Ashland 146.94 KA4OIL repeater also has their net. It runs every night at 7:30 pm.

Looking back many years, I was the first Director of Eastern Kentucky, when it was first formed. It was called CVRA/SERA then. I have seen a big difference in the way coordination has been carried on, and the improvements with less problems in our state. What a difference it makes to have a strong, stable coordination organization backing you locally the way SERA does.

That's all for now. Just wanted these few items in the Journal..... Fred.

Editor's note: Fred, why not start a Kentucky column for the RJ. If not interested, then, contact Barbara Marsh. She is now writing for West Virginia. See her address with story.

**KEEP UP WITH THE LATEST
REPEATER LISTINGS - ONLY
IN THE REPEATER JOURNAL!**

West Virginia News

I would like to invite anyone who can use the 147.135 N4AZJ repeater on Dismal Peak, south of Pearisburg, VA to join the Friendship Traffic and Information Net of the Virginia's. This net began in April 1995 and now has over 100 members. We meet each evening at 8:30 and there is a different control operator daily. (I am NC on Wednesdays.)

PREVIEWS - Next time I hope to have news from all Ted's friends, all of ours and to have made many new friends so we can keep this column going for another 14 years in honor of Ted Wolfe. Please help.

There are a lot of activities planned for July, August and September and hopefully we will receive information suitable for publishing in the next issue. There is a Balloon Launch scheduled for July 27 and is a lot of fun to participate in the chase and recovery.

Our state ARRI convention is planned August 23-25 at Jackson's Mill and there is a UHF/VHF QSO Contest weekend in September. These are just some of the things we hope to cover later.

By the way, when we meet, I warn everyone now, I want a hug. God Bless us all.

-Barbara

Are you ready for 10 GHz?

-excerpts from presentation by
Ralph Fowler, N4NEQ,
SERA ATV Technical Advisor

When Ralph rose to speak, he brought with him a little box, with a funny horn on the back, and a couple of other little horns, and small printed circuit boards.

Ralph Fowler, N4NEQ was showing off some of the Gunnplexer devices he and some other friends were using in the Atlanta area to communicate on 10 GHz. at the Summer SERA Board meeting. The basic design of the devices were made by Will Payne, N4YWK, said Ralph.

He said the devices can be used for two-way voice, data and video communications in the microwave bands.

There are two basic types of Gunnplexers used in ham radio. The 2-diode Gunn-plexer is commonly found as surplus "people detector" modules. The 3-diode type is designed for FM communications, but is more expensive and difficult to find as surplus. Fortunately for hams, the common 2-diode type can be used in FM communications with a few restrictions.

He said the Gunnplexer voice frequency pairs they were using had a 30 MHz offset and were clustered around

Ralph Fowler, N4NEQ, ATV Technical Director for SERA, holds a 10 GHz. Gunnplexer up for all to see. Ralph made a presentation on behalf of Will Payne, N4YWK, designer of the device at the SERA Summer Board meeting.

-Electronic photo by Johnny Wofford, WA4ETE

10.250 GHz. The standard voice calling pair was 10.235/10.265 GHz.

Will use of the 10 GHz. plan grow? Hard to say Ralph said. But SERA is getting ready. Ralph will be working with other members of the Board to come up with an official SERA 10 GHz. bandplan for future use when needed.

The 1.2 GHz. band will be looked into for breakdown of repeater pairs, and other uses by the end of the year also, according to Ralph.

2-meter Repeater Bands full Things we can still try to do

-by Bubba Johnson, N4CII

Didya ever travel thru or near Atlanta, Miami, Ft. Worth-Dallas? Mobiling along? Your 2-M xcvr set to Freq-Scan 'cause you didn't know the repeater frequencies?

Ha! Then what you didn't know was that there were hardly any frequencies in/around those metropolitan areas that were NOT repeater frequencies! You don't believe me because you didn't find more than three or four repeaters even though you were searching during prime hours from 1700 to 2100?

Believe it! Check your repeater directory! They are there.. coordinated repeater frequencies. The reason you didn't find them is because there are so many, there's very little use of any but the more popular long-range ones. Repeaters on back-yard towers, on water tanks, anything from seventy-five to a hundred-fifty feet is utilized. They are there, you just don't hear them! But whether they get used every few minutes or only once a month, they still tie up coordinatable repeater frequencies.

Hams traveling to Charleston, SC (or Hilton Head, Edisto Beach, Kiawah, Seabrook) used to know 147.270 was the freq to try. Plenty of friendly folks (all Chas. area repeaters are loaded with friendly folks) to chat with, get directions, highway assistance, find your friends, etc. because the 147.27 repeater had coverage from Savannah to Myrtle Beach along I-95, and all the way up to Columbia along I-26. It should! At over 800 feet just South of the I-95/I-26 junction, it was a powerhouse of a machine!

Those days are gone forever. Although the Charleston area still has bragging rights to a 1400' machine on 147.300, it is a private rather than club sponsored repeater. I dunno why, but most hams favor clubs and organizations (perhaps to ban together to maintain their long-ago granted frequency bands), and support the efforts of these organized groups more so than private individuals'.

Now! Have you noticed that no matter where you are, where you live, where ever you go you find a repeater on almost every frequency?

No Sir! In fact, SERA (our--mine and yours--repeater coordinating organization) recently asked for a moratorium on new 2-M repeaters. NO MORE ROOM, they sed!

I gotta question for ya before I quit writin' this: How come nobody has tried a repeater-cellular-service-type arrangement? It works for the BELLS! It works for the PAGERS! Why won't it work for us? Gotta answer, too! TARC (the Trident ARC) in South

Carolina's low country that had that nice 800' 147.27 machine up, but lost their lease on the tower, is now in the process of trying that very same trick. Bear with 'em.. it might take a year or so to work it all out, but the paperwork has gone to SERA and with a tentative OK, the old popular 27 Machine is gonna be up and running at two different locations: one in the heart of Charleston on the Ashley River and one way North in Dorchester County.

These will be complete repeater systems (not remote receivers) permanently linked on 440.

Another pair of repeaters using 147.345 will be located at Adams Run (near Edisto Beach) and Huger (middle of nowhere, but 'bout half way 'twixt Chas/Geo'tn/Sumter). Just think! FOUR repeaters for the price of ONLY TWO coordinated frequencies.

Cross your fingers and hope the bugs don't survive! This may be the idea that frees up our 2-M band plan.

BTW, give a listen on 147.345 for "INTERNET REPEATER KN4IM". I'm not going to give away the secret here, but it's mighty interesting!!!

73, Bubba/N4CII for TARC (SC)

INTRODUCING

RLC-CLUB DUAL PORT REPEATER CONTROLLER

Announcing the new RLC-Club. This new exciting controller combines the power of expandability, the ease of set-up possibilities with the included Windows™ programming software, the power of the multiple repeater control and the price to meet any individual or club's budget.

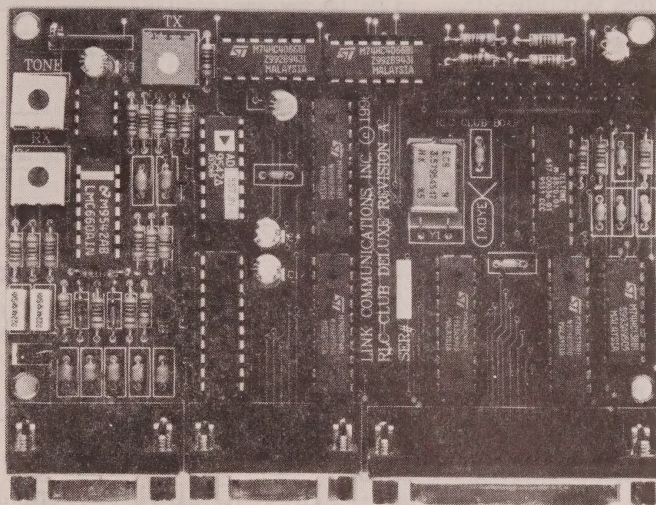

RLC-CLUB

Only the RLC-CLUB controller system gives you Windows™ programming software that allows timers, messages, users and most functions to be set-up with the ease of a computer; very powerful autopatch features, and multiple repeater control at such a low price! And with the addition of the RLC-Deluxe module an additional radio port, increased output controls and support for our large voice mail based Digital Voice Recorder is provided.

- Full-duplex radio port for repeater, link or remote base applications
- Built-in autopatch with a 500 number autodialer, 500 call sign slots, 500 number long distance dialing table
- TI voice synthesizer with 685 word male, female and sound effects library
- Internal basic Digital Voice Recorder allows custom recorded voice messages

(See specification sheet for additional features)

See why the RLC-CLUB knocks the competition's socks off!

RLC-Deluxe

The RLC-Deluxe module is a path for upgrading your repeater system. With the addition of this module, the 'Club' can be upgraded from a single port voice based repeater to a dual port system. The 'Deluxe' module's radio port can operate separately from the CLUB's radio port with its own ID's, courtesy beeps, timers and DTMF control. The 'Deluxe' option also adds 8 output control lines and support for the RLC-DVR1, voice mail Digital Voice Recorder system.

- Additional full-duplex radio port for repeater, link or remote base applications
- 8 output control lines used for user applications and some remote base interfaces
- Icom, Kenwood, Yaesu HF remote bases supported and can be added to your repeater with the 'Deluxe' module
- RLC-DVR1 Digital Voice Recorder system support

The RLC-DVR1 is a powerful digital voice recorder system that provides high quality 64 kbit/sec voice recording. This unit provides 250 general message slots, 500 private mail slots (Used in conjunction with the 500 user system on the 'Club'), and 10 public mail box slots. The interface requires user provided DRAM in 30 pin SIMM configuration and provides 131 seconds per/Meg of memory. Minimum memory needed is 2 Meg and maximum memory supported is 16 Meg. Cost for the RLC-DVR1 is \$400.00 with cabinet enclosure.

Price:

RLC-CLUB Controller \$500.00 • RLC-Deluxe Module \$175.00 • 19" Rack Enclosure \$ 50.00 • s/h/i extra

Link Communications, Inc.

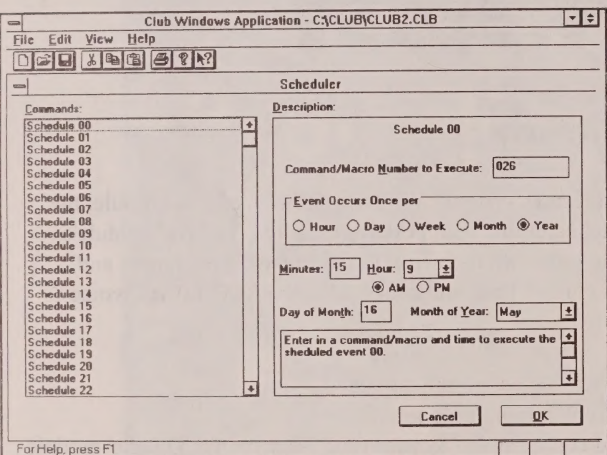

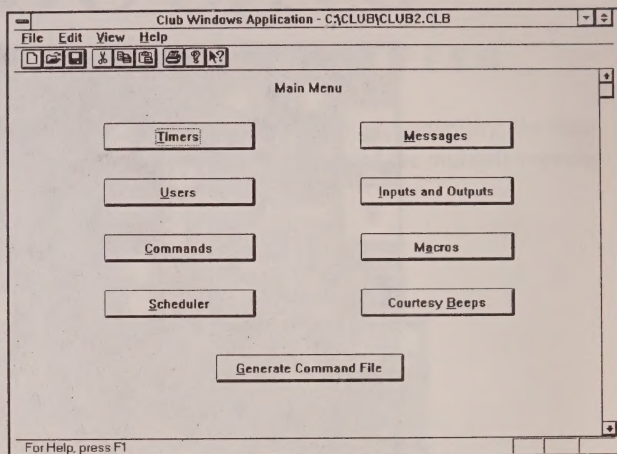

115 2nd Ave. NE • P.O. Box 1071 • Sidney, MT 59270-1071

Prices subject to change without notice

RLC-CLUB'S WINDOWS™ PROGRAMMING SOFTWARE

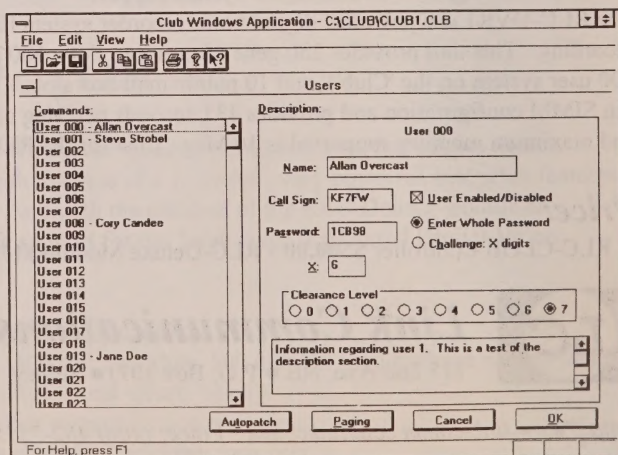

The RLC-CLUB includes Windows™ programming software. This software allows the users to set up the vast number of features on the controller. Once the CLUB'S software is running, you have several areas you can choose from for setting or changing the set up for your repeater system. Once changes are made you can and upload the changes to the controller or save the changes on your disk drive. You can have multiple configurations stored for each of your separate controllers.

The RLC-CLUB supports a complete scheduler package allowing for time control of events on the 'CLUB'. A menu option allows for setting up the scheduler in its hourly, daily, weekly, monthly and yearly formats. With use of the software, the user can easily set up when events occur and what the events do when they do occur.

The 'CLUB' also supports message programming using the spoken words of the voice/cw library. This allows users ease in setting up the message structure of the 'CLUB'

The 'CLUB' offers the repeater owner controlled access to the system. With a 500 user structure, the 'CLUB' can control who functions the repeater and what level each user can operate under. Each user has their own callsign, memory dial number, password, access level and paging information. The owners can enable or disable users at a click of the mouse button to control each user's access.

INCLUDED AT NO COST!!

RLC-CLUB TECHNICAL SPECIFICATIONS

Ports	• 1 - Full duplex port used for repeater, link or remote base radio • 1 - Additional full duplex port for an second repeater, link or remote base radio (Requires the RLC-Club Deluxe Interface)
Autopatch	• Built-in autopatch with DTMF regeneration, forward and reverse programming functions • 500 number autodial memory, 500 callsign slots, 500 number long distance dialing table • FCC Part 68 approved with 3-way voltage surge protection and line current detection
Inputs and Outputs	• 4 - Analog inputs for reading of voltage, temperature and any analog functions • Analog inputs can be calibrated, alarmed, voice message formatted and high/low monitored • Analog inputs can be used for contact closure detection for site alarm monitoring • 8 - Output lines available with the RLC-Club Deluxe Interface
Remote Bases	• Doug Hall RBI-1 - The 'CLUB' supports the Doug Hall RBI-1 Kenwood remote base system. This system allows the user to remotely change frequency, power, offset and PL of Kenwood radios • RLC-ICM - The 'CLUB' supports the Link Communications, Inc. RLC-ICM Icom 900/901 band module remote base control system. This allows the user to remotely change frequency, offset and PL (using the Communications Specialist TS-64 of up to 4 Icom 900/901 band modules. • Icom / Kenwood / Yaesu HF - The 'CLUB' supports remote frequency control for most Icom, Kenwood and Yaesu HF radios with serial inputs.
Serial Port	• RS-232 serial port with user selectable baud rates of 300 - 19200 baud
Windows™ Support	• Complete Windows™ programming software included for graphical computer programming of the 'CLUB' features. This program allows set-up of the system timers, users, messages, macros, autopatch numbers, tones, inputs and outputs, commands, scheduler and much more. • Serial terminal support allows users to upload from disk current controller configurations
Program Features	• Voice synthesizer based on the TI TSP53C30 processor with 685 words • Single or dual tone generation for courtesy beeps, CW and any tone response • 100 timed event scheduler slots with real time clock and voice readback of time/date • 500 multi-command macros allow you to make customized commands • Built-in front panel LED display panel shows COR, PL, DTMF and PTT for all ports • Built-in basic Digital Voice Recorder for recording ID's, announcements and messages • Support for the RLC-DVR1 complete voice mail based Digital Voice Recorder System • Optional Digital Audio Delay modules for each radio port • Optional Squelch modules for discriminator derived COR signal • Optional 19" Rack mount enclosure
DC Parameters	• Operating voltage of 11V-15V with a current draw of 155mA@12V • Microprocessor: Motorola MC68HC16Z1 with 256K SRAM variable storage • FCC Part 68 telephone interconnect, FCC Part 15 class A noise acceptance • DTMF decoder: Teletone M-8870. Tone DAC generators: Analog Devices AD558JN • Separate DB-09 connectors for the radio ports, serial and I/O signals

Field Day again enticed me to make a visitation to the outlying stretches of Eastern North Carolina, to the extent of over 400 miles in the 24 plus hours of June 22-23. We added two sites in the Raleigh area, and a trek down US Route 40 to Benson to our itinerary.

Two strike outs

My original intent was to start at the Carteret County site in Newport, but as I was heading out, the 145.45 repeater was letting its members know there would be a delay in setting up the site, due to a picnic of little leaguers having a claim to the pavillion. The thought of stringing antennas and erecting temporary beams amidst errant baseballs and swinging bats was sufficient to postpone the club's starting time.

So I headed the other way toward Kinston. Now the 146.685 Grifton repeater came alive with information from Jean DuPree, KB4OHX, that their group had also abandoned plans to participate. I was looking forward to seeing the new storage building they were constructing, but did learn about the Skywarn activities going on at a nearby shopping mall.

Through the talk-in help of Ed Jones, KF4BPN, and others, I managed to find the mall and meet Dan Bartholf, N2RNF, a NWS Warning Coordination meteorologist from Newport. His display was being ignored as the local fire department was presenting a puppet show at the same time. I didn't wait, but headed west again on Route 70.

Crane in the sky

After a little 'honeydo' shopping at Sams, I was surprised about a quarter mile later by a six-element beam atop a large crane about 40 feet from the four lane divided highway. A quick turn around at the next exit and a little exploring led me to the Wayne County ARC site on the parking lot of a flea market, courtesy of Keith Hartzog, KE4VKH.

Don Sundergeld, N0YXM, and Jim Davis, KK4MM, had set up the Wayne county

ARC banner facing the highway, and got me to sign as a visiting journalist.

Just as I was leaving, the real coverage arrived, and the publicity bonus for the club was solved.

Cary at Bond Park

Next was the decision as to which site in the Raleigh area would be first. After a discussion with the many hams who gave directions, I selected Bond Park and the Cary ARC site. After several wrong turns and an almost encounter with some debris that looked like a old Collins or Hammerlund receiver in the middle of Route 64, I found a delightful site, manned by Tom Klimala, KM4LB, overlooking a corner of a small lake.

Spread around this could-be soccer field were several locations, all separately powered and hidden among the bordering trees. Frank Lynch, KE4ZEQ, and Bod Lukaszewski, KB9MS, were manning the 40 meter SSB tent, but did take a break to pose for me

at one of the exercise markers on the workout trail that bordered the open field.

I walked the path, and found the others were beginning to make contacts, and didn't interrupt except to note that one site would only have its antenna above water if the dam should break. Editor Tom also noted there would be a swapfest on July 20th.

Raleigh in the woods

Next was a jaunt through the new airport access, to the RARS site in Umstead Park. Now here was a real woody setting. I didn't realize there were almost native forests within the city of Raleigh!

Mark Freeze, WD4KSE had set up an ATV station and was preparing to send visuals of the activities to the Durham TV repeater when I arrived. The Apex Boy Scout troop and Chris Seigl, KE4TMO, were cooking over a fire pit and serving about thirty people plus the many outposts who were still working stations.

I met so many people, all enjoying the activities, and remarked that it was a great credit to Field Day Chairman Mike Murphy, WA4BPJ. President Cyndi Wood, KD4ACW, has a second successful activity, following the RARSfest which attracted over 3500 people in April. Mike Milan, KE4OQO, talked me through the woods and back to Route 70, and I was again on my way.

Contacts prove fruitless

Next was an attempt to contact other sites along Route 40 to the JARS location outside of Benson (I thought). I tried to rouse several repeaters and ask questions, but most operators seemed either not to know if there were any activities or chose to ignore my contacts.

But the 147.27 repeater guided me to the Johnston ARS picnic site and alligator lake

(Continued on next Page)

BATTERIES FOR TODAY'S AND YESTERDAYS H/Ts

Williams Radio Stocks over 73 different models of battery paks for over 137 different radios. We are proud to be associated and able to purchase direct from one of America's leading manufacturers of "after market" Batteries. You'll find our prices very competitive and our batteries great!

Serving the Amateur Public for over 22 Years

North Carolina News Continues

(yes, there is an alligator which lives there - not Walt Bastow, N4KVF). John-Paul Keon, AB4PP, was pulling in the 50 WPM CW contacts, which sound like static to me.

Mark Hammond, KC4EBR, was demonstrating his home brew satellite antenna, making a contact on an 8 PM pass, and Earl Daughtry, N4SNV, demonstrated his prowess at handling check-ins as the evening net brought over 50 'in and outs' as quickly as the mike could be passed from mouth to mouth.

Well-fed and vowing to return to some more JARS activities (they are a fun group - including a 'lid' award with a flip top covering a circular frame, awarded monthly), I decided it was time to start in a northeast direction toward home.

Brightleaf ARC next stop

With Pamlico County as my goal, I drove along Route 11 into Greenville and visited the W4AMC setup at the Boys and Girls Camp. Couldn't miss the large backlit sign, but the site only had a few operators at that hour of the night.

Setting off toward Pamlico County, the night began to catch up with me when I couldn't get anyone on the 147.345 repeater, but I did have others keep me company for a few miles on the Grifton 146.685. I must apologize to Bob Richardson, KR4TW, and the PARC club, but I decided to miss their site this year as the hour was late.

Sunday morning saw a local trip to the New Bern ARC site in Glenburnie Park next

to the Neuse River. Saw neighbors Bob, KD4CVF, and Charlotte Adams, KE4DTK, with Ray Hemphill, KI4SJ, who told me he was getting his late father's call, W7OPH, under the new vanity system.

The club was operating under trustee Tommie Phelps' WA4EME callsign, but didn't seem to have a moonbounce station setup. Kevin Beck, KF4DDU, had a LARGE van available, but the weather was cooperative this year and the open pavilion seemed to work fine.

The club is trying to restart a Saturday morning breakfast at Billy's eggs and 'Ham' and invites all who may be passing through to a day at the beach to stop on their way. The restaurant is not far from the Glenburnie exit of Route 70, announced David Works, KE4LNU.

Western NC Newsletters

The western NC area began sending me club newsletters, and one impressive publication comes from the Alexander County ARS/RACES and Editor Jonnie Hutchinson, AA5AQ. Filled with informative articles, plus neatly presented, it is one fine presentation.

The article on meteor scatter signals by technical director Dan Renfro, WA4PXV, was especially interesting. The group meets at the Alexander County Court House on the third Saturday at 7 PM, with 9PM nets on Sunday (146.85) and Wednesday (442.95).

Lenoir ARC boasts a web page at <<http://www.wp.cc.nc.us/ham/larc>>, according to Editor Gary Suddreth, KD4YTU. One activity was communications for the Brown Mountain Enduro competition of the Unifour Trail Bike Club last March. Clayton Crump, KE4VJH, gave an explanation of the event,

which I first thought was some type of e-mail program <g>.

The group also attempted a simplex two-meter net for emergencies when the repeater on 147.195 might be down. They planned Field Day activities and a fox hunt for later in the season.

Birthday Calendar

An interesting feature in the Western Carolina ARS Smoke Test is the little birthday cake graphics indicating members celebration dates, presented by VP Kevin Schroeder, KD4TOZ. The group also is in the process of getting a new repeater installed.

Field Day events were planned for the AB Tech campus, under the direction of Co-chairs Ken Smith, KE4VDB, and Jeff Dover, KE4VMN. An April activity was providing communication for the Multiple Sclerosis Walk, chaired by Dan Henderson, WA4QQN. The group is also planning for their Hamfest on July 27 at the Haywood County Fair Grounds.

Many newsletter feature internet information and addresses for contacting web pages and editors. Not to be outdone, I remind all to send their tid-bits to me at <glegely@coastalnet.com>.

CORRESPONDENTS WANTED

The Repeater Journal Editor is looking for persons who would like to write and provide coverage in the Journal for their home State. We presently have openings in VA, TN, MS, GA, SC, & KY.

Interested, contact the editor!

If you work VHF/UHF YOU NEED the SERA DATA Directory!

- 14 States of Updated Repeaters
- VHF/UHF Frequency band plans
- 8-state club meeting calendar - 300 clubs
- 8-state repeater net register - 200 nets
- 10-state VE Exam schedules 200 schedules
- The SE Hamfest Calendar 180+ schedules

- The History of SERA
- Items of interest about VE, ARRL, phone #s
- SERA officers and directors listing
- 8-State Amateur & repeater census
- Southeastern Dealer listings
- And much, much more!

The SERA Directory & Source Book will keep you up-to-date for the entire 1996 year.

545 WATERBURY DRIVE, FAYETTEVILLE, NC 28311

The Dummies Guide to HAM Radio Terms

Heads up, Upgraders, Smarty-Pants, and Honored Keepers of the Spark & Gap! Learning about the Radio is a life-long process. Since it is a hobby*, you can stop learning anytime you want to. Who wants to stop? Not US, HAMS and HAMETTES! We all even know old and ole Advanced and Extras that are still building, listening, reading, creating, and asking questions. And having a whole bunch of fun like my beloved Uncle Elmer, W4EHF, who is a Master Radioman but would probably tell you that he is still learning.

However, there is much in Radio that the books don't explain. So, this is a lot of the really secret stuff! You know, the GOOD Stuff that you thought you'd have to wait to learn after you learn the Secret Handshake. And, of course, your Happy Hamette, will tell it all, Brothers and Sisters!! Gonna tell it all!!

Destinated - As in "I am destined". NOT a real word, rather a state of mind. (see also DUMMY LOAD)

Dummy Load - What do you get when you load 10 Cbers in a Toyota?

Ground - When your Elmer tells you to "ground your station real good" he or she does not mean to dig a hole and put the Yeasu IN the yard. He means for you to learn plumbing and weld it to your cold water pipe so you can learn another trade make more money to buy radios with. (I really do have to explain everything to you, don't I?)

Heat Sink - Where all that hot air on the radio really goes into! It's either looks like a little old-timey room radiator on the back of a portable HF or VHF or is a little flat metal thing on a HT that God has the radio makers put on the back of Radios that absorbs most of (but not all) the extraneous drive that is: embarrassing and stupid that anyone can say. I'd still watch my mouth, if I were you.

Hertz - Happy Heinrich had hardly hold of hot half homogeneous Hallicrafters HAM, had he? However, his HAMETTE hurriedly had hot jalepeno hotcakes heated to heighten - Very versatile. You can talk and cook on it at the same time. Can't do that with a heat pump or an Kenwood!

Personal - as in "What's your personal?". I beg your pardon! My personal is private!

Phone Patch - Frankly, your Happy Hamette thinks it would be more practical, not to mention less awkward, to get a piece of patterned cotton or felt that matches the radio for the patch instead of a big old clunky telephone to put over a the radio. Whenever Radio Romeo puts on a phone patch on the HF rig, it always falls on my foot unless he tapes it to the radio.

Roger - Supposed to mean "yes or received your message" but, HAMS call each other that when they forget someone's name, too. You can say, "Roger, Roger" and the other HAM will not know you forgot his name! The first person to forget names on the Radio was named Roger Forgetmenot Rogers (our Cousin Bubba's side of the family).

RF choke - Let go! That is my Icom you are squeezing!

Tuning in Step - Do you looove mee? Now, that I can dance, as the song says! Or, tuning in step on an HF 75M net is sometimes like Dancing with the Alligators.

Toroid - What your Radio can get if you let it sit too long without using it! (Happy Hamette home remedy tip: Preparation HT sold at, you guessed it, Cuzin Bubba's Radio, Tire, and Bait Store. Hamettes served free fish on Wednesdays!)

Traffic - This is the term for messages passed by voice, CW

Journal Briefs...

Rollin Ransom, NF4P - SK

We are sad to learn of the death of Rollin Ransom, NF4P, of Raleigh, NC. He was found dead on July 4th at his home. Rollin, a member of RARS was a mainstay helper and leader in the annual hamfest.

Hams turn out in Hurricane wake

Amateurs on the east coast turned out assisting during and after Hurricane Bertha. We will have further information next issue.

A real Interference lecture

Confused about causes and cures for radio interference. See the SERA Web page: <http://www.wku.edu/~martija/sera.html>. There is a great page describing all the causes, reasons, and cures for all types of interference.

NFCC elects new Directors

National Frequency Coordinating Council members have held an election and elected

five members to a NFCC board of Directors. Elected to 2-year terms were: Dave Shiplett, AC4MU (SERA); Dick Isley, WD9GIG, (MACC) and Owen Wormser, K6LEW, (T-MARC). Elected to one year terms was Whit Brown, WB0CJX (MACC-CO), and Jim Fortney, K6IYK (220-SMA).

FAR Scholarships awarded

The Foundation for Amateur Radio, Inc. has released a list of 56 scholarship winners for 1996. The 1997 applications will begin in January or February. For further information, contact FAR Scholarships, 6903 Rhode Island Ave., College Park, MD 20740

Outstanding community service

James Vann, KA4MHJ of Spencer was named as a 3rd place winner in the Cooper Industries' Volunteer Spirit Awards program, to recognize employees who are outstanding community volunteers. Jim who works at the company's Wagner Lighting operation in Sparta, TN was recognized for his part in Amateur Radio public services.

Son gets father's call

W4DCR is a call that hasn't been heard since 1984, when Eugene J. Troutman died. Today that call is alive again, thanks to the FCC's new vanity call sign program.

John Troutman of China Grove, (NC) now proudly owns his father's old call sign. He applied for and got it in June.

Eugene Troutman was originally licensed as W4DCR in 1934, a year after his son John was born. He obtained DXCC on AM. There were only 230 countries at that time. He also obtained WAS, WAC and WAZ.

After World War II, Eugene would handle phone patches for servicemen overseas to their families in the US.

John said his father left many friends, including Jack and Francis Krepp, W4SIB and W4KYI, and Ferman James, W4YPZ.

Now John has made his father's call come "alive" again. His friends, and his father's old friends approve and are happy for him.

John said he wants to keep the call in the family. "I have an amateur son, so someday when I'm gone, my father's call can be passed from me on to my son - keeping it in the Troutman family."

OUT OF SERA TERRITORY REPEATERS JOINING AS FULL MEMBERS - FOR 1996 -- 19

- (1) Total Virginia list does not include 90 or more repeaters in T-MARC Territory, (North of Highway 33 and Latitude 38-degrees North, and 9 Repeaters in the West Virginia Panhandle area.
- (2) Georgia assumed SERA District Status in mid 1985.
- (3) East Kentucky assumed SERA District in 1985. In late 1989 the Western part of the State joined and district renamed Kentucky District.
- (4) Mississippi assumed SERA District Status in late 1989.

Updated as of 7-21-96

Repeater Datasheets

(Continued from Page 3)

tion stored on our data base concerning that repeater is also included. Owners should check the sheet carefully, update as necessary, and return the data sheet promptly.

Please return the data sheet!

Previously, repeater owners not returning data sheets, or returning them incomplete, were assisted by our operators looking up, calling for, or guessing at numbers.

This year, nothing will be guessed or estimated. It will be left blank.

The coordinator will get a copy of the data sheet. Then he will make a decision. If he decides there is insufficient information, or no information (no sheet returned) he has to assume that the machine may not be on the air, and will begin "de-coordination" proceedings on that repeater.

Follow these simple suggestions

1. Return the data sheet promptly, definitely before January 1, 1997.
2. Fill out ALL spaces accurately.
3. Check to see that your EXACT location in Longitude and Latitude is correct, down to minutes and seconds.
4. If you are inclined and wish to financially support SERA, enclose your \$20.00 check for Full Membership. Be sure to check off blocks for membership, and list two persons.

SERAs services are FREE for the 8-states in the Southeast. Membership is NOT required.

We also remind repeater owners, that voluntarily Full Membership and the listing as such in the Journal does not constitute SERAs agreement as to any coordination issues, the condoning of any illegal, or non-conforming operations. It merely means financial support through membership acknowledged and appreciated.

happy hamette Continues

or digital modes. It is called traffic because it come and goes or can even stop. Or gets lost on the packet highway.

Trap - What to watch out for when you are fixing or climbing an antenna. They put them in the antennas on purpose to catch those little frequency buggers (in the South, these animals are also called "snipes") so that alligators found on HF bands can't eat them as easy. - see also: Balun - Radio lingo for being careful and keeping your balun and your foot out of the antenna traps. These are round things that you put on the antennas to keep the squirrels from climbing the antennas.

Zero-Beat - It is illegal to make music on the Radio. So, that is why we say we "zero beat" the frequency on the HAM bands.

*Amateur Radio as a "hobby", op cit Maxim, H.P., WIAW, Yeasu Musen Co.; certain 2M NTS traffic handlers; Pizza Hut, Inc.; and the Charlotte Hamfest Parking Lot Attendants et al; QST-Q, 1919, 1924, 1992. This theory first proposed in 1919 and remains, in official FCC Part 97X-A as a "hobby" - see page 101.

(This column contains: 37 calories, 0 grams sat/unsatpoly/trans fat, 2 grams chili today and 3 grams hot tomale, with a blllllggggg grain of salt !)

Please eat after reading Cindy, KR4LS!

What originally started out as an internet test is winding up being a complete photo test for the Journal. Cindy sent us this photo via the internet. We downloaded it into our PhotoShop program, toned it, resized, and imported it into our desk-top program, where it was out-published with the page. We are working to see what size dots (highlight and shadow) are needed for good reproduction, after the page goes through the negative, then plate process which each cause some losses. That's Jim, N4FHM, Cindy's husband (radio romeo) with her.

SUMTER HAMFEST

Saturday, October 26, 1996 (4th Sat. in Oct.)

Editorial Comment . . .

(Continued from page 1)

Have been noticing empty tables, or open spaces at many haamfests this year. The "downsizing" we predicted last year has started. There have been several dealers who have gone out of business; several who once traveled these parts from the midwest, are now staying home; and several dealers who have cut down on the number of shows they visit.

There are no particular shows this is occurring - it is widespread all over.

I have more predictions, but I'm kinda afraid to express them aloud. I can say this. Hamfest sponsors had better start buckling down, cutting their expenses, at the same time keeping table prices down, maybe even cut prices, and be extra nice to the public. I think the table "sell-out" fun days are gone and probably will never return.

25th Anniversary Celebration

(Continued from Page 9)

Winnabow, 15 miles southwest of Wilmington. The packet node systems are at this site in a building under the tower. The packet transceivers are located in a cabinet 850' (agl). A satellite site is located at Clinton, N C. (KM4EO-5).

Local Area Network (LAN) 145.690 antenna is located at 800' (agl).

145.01 antenna (Wide Area Network) is located at 850' across from the cabinet.

147.480 High Speed Network antenna is located at 900'. Packet TNC's along with the BBS system (KM4EO-2) is located 850' below in a small building, which the club is allowed to use for this purpose.

Essentially this system operates with the TNC's on the ground and the transceivers up on the tower, providing a short feed line.

Mark Bitterlich, WA3JPY has a vast knowledge of packet and bulletin board systems. With his help the BBS system has been streamlined into a very efficient system with high speed data capabilities from Newbern to Wilmington to Fayetteville to Locust.

Dexter McIntyre, WA4ZIA and Derek McIntyre, KC4FWC have also been dedicated in continuing the route from Wilmington to their hometown, Locust (near Charlotte). Ricky Smith, KC4WPG's dedication and involvement with packet has tremendously aided the BBS forwarding system.

Good repeaters, packet systems and BBS's do not just happen - they are the product of many hours of hard work by many dedicated hams throughout these 25 years.

THANK YOU - ALL HAMS who have ever participated, supported etc. during these 25 years. We are looking forward to the next 25.

Isn't Amateur Radio wonderful - the greatest way to make new friends.

The SERA Repeater Journal Southeastern HAMFEST/CONVENTION SCHEDULE

AUGUST, 1996

- 3 High Point ARC HF at Armory, HIGH POINT, NC
- 3 MO State ARRL Conv/HF, SPRINGFIELD, MO
- 3-4 N.F.L. Sec. ARRL Conv/HF, JACKSONVILLE, FL

IMPORTANT NOTICE

The Repeater Journal will publish the entire 1997 Hamfest Calendar in the upcoming November issue. Over 180 listings. Updates and confirmations should be sent to Wayne C. Williams, K4MOB, Editor, the *Repeater Journal*, 600 Lakeland Rd., Colfax, NC 27235 or E-Mail to: k4mob@nr.infi.net. **Deadline for entry is Oct. 15th.**

Please Note: Hamfest dates marked with an asterisk (*) are NOT confirmed and are based on information on record from the previous year's date, with no guarantee of accuracy. Hamfest sponsors are urged to get their correct show dates to the *Repeater Journal* Editor as soon as possible. We acknowledge and appreciate assistance in confirming dates from *TSRAC AR News Bulletin*, *Florida Skip*, *AutoCall Magazine*, *Magnolia Letter*, *Ohio Section Journal*, *SERA* & *ARRL* Directors; the ARRL and the response of many clubs and individuals sponsoring hamfests and computerfests.

Remote Bases causing some 2M problems

-by Wayne C. Williams, K4MOB

Just dial up the handy little remote base system on the mountain, to the input of your favorite 2-meter repeater, and "wall-llla" instant relay or 2-meter linking system!

This is often done! Instant linking is really neat, but, many times, this great idea also provides instant malicious interference.

The thing most forget is that the remote base system is pumping out quite a few watts at a very high location, similar to a repeater location - on the INPUT frequency of a repeater.

We probably would seldom key up more than one repeater when we operate from our home. Put your radio on the antenna of a remote base, designed for wide-area operation (aren't they all), and you'll be amazed at what you hear and what you can work.

There's the problem. What the remote base can hear, and what it can work. Chances are there are at least more than one repeater on the same frequency it is

capable of keying up. On some frequencies in some areas, there may be 2 or even 3 repeaters capable of being keyed up by a remote base location. The innocent operator of the remote base system seldom is aware of what he is doing. His system is keying up multiple repeaters on the 2-meter band.

A remote base system operates very similar to a repeater. It takes an input signal and rebroadcasts it to an output frequency, which in most cases are tuned to repeater inputs.

Since a remote base system is a repeating device, and has a capability of being tuned to various input and output frequencies, it basically is a "Frequency Agile Repeater," which has not, nor could be coordinated. This situation has been ignored by the FCC since it started a few years ago.

Enough problems could cause them to re-address the situation. Especially if repeater groups get interfered with enough by a remote base system.

Another stick in the mud is the operator of a remote base system who tunes to any repeater's input he desires, and car-

ries on a linking or relay session without the owner's permission of the repeater he is hooked up to.

2-Meter Remote Base - bad idea

Cross-banding on a remote base is not quite as bad, but on the crowded 2-meter band, you can be assured, you probably are causing some type of interference, no matter which repeater you try to link into. If you get a phone call from an irate repeater owner after you have used his repeater on your remote base - be careful! He has just been maliciously interfered with by your system. You were the guilty one, even though you may unknowingly have caused the problem.

Cautious Operation is best!

If you own a remote base system operating on 2-meters, use extreme caution when when you move around and turn the system on. Be sure repeater owners are aware you will be using their system occasionally, and have they blessin' before you start.

Do your homework. Know what other repeaters on the same frequency are on the air, and where they are located. Find out if your remote base system keys them up. If so, make adjustments as necessary to eliminate this problem, or otherwise you could cause much trouble.

Swamped with guesses About SERA May Cover

We made a mention within the story about our cover last issue of the Repeater Journal. We said there was something unusual about the picture. Contact the editor if you know what it is.

Well, they did. We were inundated with phone calls, notes, letters, e-mail and a few faxes of guesses of what was unusual about the cover.

Actually, we had a winner about 4 days after the Journal was out. John Covington, WN4BBJ of Charlotte correctly guessed that the photo also appeared on the August 1988 RJ cover.

It was fun, though. Here are some of the guesses we received . . .

- Photo taken in spring, due to flowering Azalia.
- No visible HF antennas
- Sun is producing funny shadows
- The slide has been inverted
- Look carefully behind the left most antenna tower - are there two deer standing there????
- There were 3 identical towers
- The cover said 10-states of indexes instead of 8.
- There is a cannonball in the foreground.
- All the vehicles in the photo are Fords.
- What happened to April - it's missing?
- Where are all the people??
- Picture was taken during VHF Contest.
- The parrot is in color

We appreciate everyone taking time out to send us in a guess.

Editor sez no Repeater Index on Web Page

Wayne C. Williams, K4MOB, editor of the SERA Repeater Journal said that repeater indexes will not be available on the SERA Web Page.

"For one thing, it gets too complicated with our copyright restrictions and requirements," he said.

SERA has always maintained indexes accurate and up-to-date as possible, for publishing in the Repeater Journal. He said that the Repeater Journal is one of the most important things we are able to supply amateurs in the Southeast, aside from coordination of repeaters.

To post this stuff on the web, would be unfair to all our supporting (paying) members, and would probably decrease the value and desirability of the Repeater Journal for future paying members. The Journal costs SERA and its members over \$25,000 to print and distribute annually. In addition, several thousand dollars are required for soliciting, managing and storing the information, and updating it quarterly.

Williams said unless something drastic changes, it is unlikely that any of the "update" type information on the SERA data base will be put on the web. Not only repeater indexes, but this would include VE exam schedules, net registers, club calendars, and hamfest schedules.

SERA on the Web!

We now invite you to visit SERA on the World Wide Web.

[HTTP://www.wku.edu/~martija/sera.html](http://www.wku.edu/~martija/sera.html)

On our web site you will find pages of valuable information including "how to" instructions for coordination, solving interference problems, different forms, frequency plans, names of your Director and Vice-Director and much more.

Actually the SERA Web page was approved last January at the Winter board meeting, but was not to be released until it was virtually complete.

Jeff Martin, N5KOL, Kentucky Director has been doing most of the work on the page. Various people in the organization have provided him appropriate information, but Jeff was the one who did the final work. The SERA Board, after a review of the Web Page at their Summer meeting, told Jeff to release it to the public.

Your comments about our Web Page will certainly be appreciated. Send them to Jeff as instructed on the page.
